PROJECTS

Youtube Converter – Youtube to (mp3 | mp4) downloader
Url – https://ytconverter.netlify.app/
Vue.js, Node.js, Express
- Integrated youtube-dl to enable download of Youtube videos
- Developed an express backend to handle youtube conversion and send downloaded youtube videos to the client
- Built a Vue.js client to make request to express server
- Added feature to Search Youtube Videos and get the youtube url. This feature makes it so you don't have to leave the page which no other youtube converter on the market has.

TikTok App – Tiktok clone utilizing a tiktok scraper
Url – https://tiktock.netlify.app/
Vue.js, Node.js, Express
- Created a RESTFUL API with Express server that scrapes TikTok posts and returns the posts in json Format
- Integrated Node.js streams to temporarily download Tiktok Video and send to the client side
- Implemented Feature to search Tiktoks by (user, hashtag, musicId, trending)

Twitch App – Twitch clips viewer, Twitch api client
Url – https://twitchy.netlify.app/
Vue.js
- Implements Feature that allows users to Search Twitch Channels on user input
- Designed and developed the UI
- Uses a component based infrastructure, application uses Vuex so that each components handles a single task

EXPERIENCE

Emaginos — Web Dev Intern
Phoenix, Az – March 2020 – August 2020
- Refactored highly-coupled non-DRY code that consumed countless hours from developers
- Worked on several projects dealing with Wordpress sites along with legacy dreamweaver sites
- fix existing bugs and delved into the various needs of clients
