PROJECTS

Youtube Converter/Downloader – [View Project](#)

Vue.js, Node.js, Express, Bootstrap, Youtube-dl

- Allows user to search youtube videos by consuming the Youtube API
- Utilized Node.js streams to allow conversion/download of youtube videos
- Component based architecture, where each component is responsible for a single action

TikTok Clone – [View Project](#)

Vue.js, Node.js, Express, Archiver

- Created a RESTFUL API with Express that takes a username and responds with tiktok data in JSON format
- Supports downloading multiples videos into a zip folder
- Implemented various Bootstrap components, that follow UI/UX principles

Twitch Clip Viewer – [View Project](#)

React.js, Firebase, MongoDb

- Implements user authentication with Firebase allowing users to sign up with their gmail accounts
- Allows users to create a favorites list, using MongoDb to persist the data
- Designed and developed the UI
- Implements router guards checking that users are authenticated before being able to access the favorites page

EXPERIENCE

Emaginos — Web Dev Intern

Phoenix, Az - March 2020 - August 2020

- Refactored highly coupled non DRY code that consumed countless hours from senior developers
- Worked on Wordpress sites making changes according to client's needs
- Fixed existing bugs and was in charge of making change to legacy dreamweaver sites
